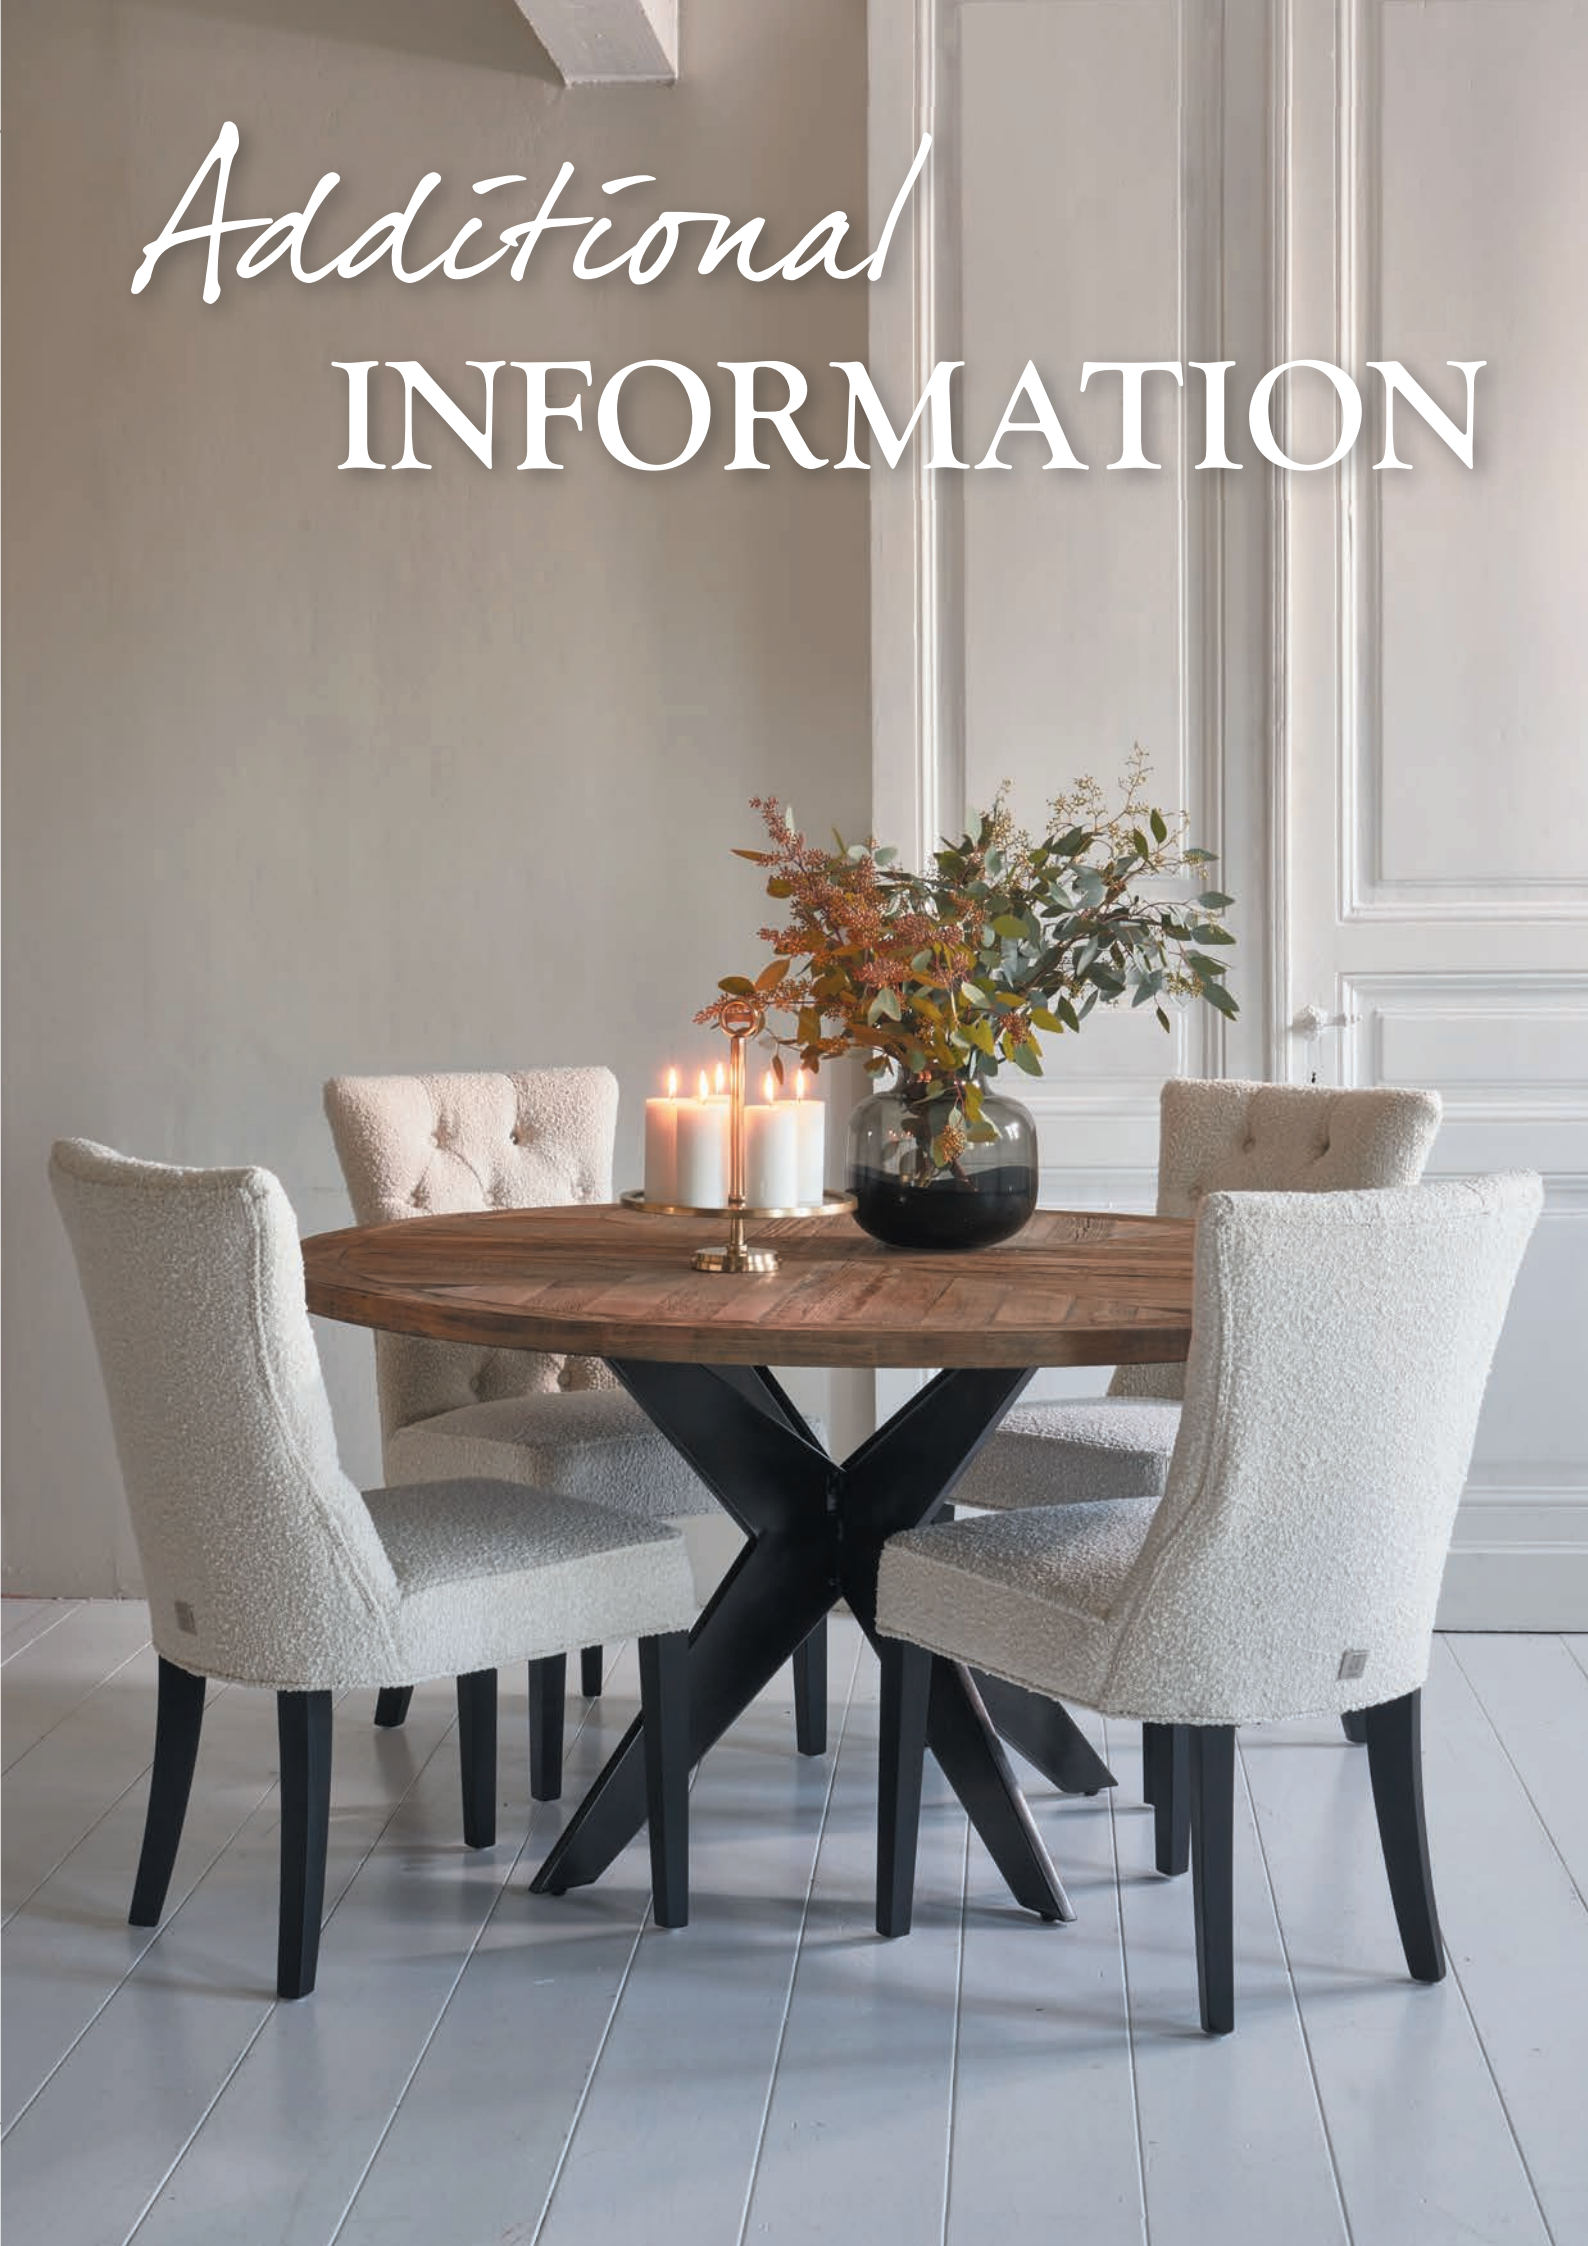
Additional INFORMATION



RECLAIMED WOOD

Wood plays an important role in the manufacture of furniture. Rivièra Maison mainly uses reclaimed wood that comes from old doors and beams, which has a character of its own. We call this 'untouched': untreated and as good as in its original state. You'll see holes were the hinges used to be, cracks in antique doors become cracks in the tabletop, and a door that has been frequently exposed to rain has a different colour to one that has mainly been dry and/or in the sun. Old, weathered and natural: that's what Rivièra Maison prefers to work with.

Properties

Wood moves. The way in which it moves varies and depends on the space in which the furniture is placed. Wood shrinks or expands in response to changes in humidity and temperature, sometimes causing damage in the form of cracks or tears. This is unavoidable and gives the wood its natural character, so an even temperature and humidity are important. Wood is also sensitive to direct and indirect sunlight and daylight. Oiled or waxed wood will always turn darkerover time than varnished wood, and painted surfaces can also discolour with light.

As with all 'living' materials, every piece of wood, and therefore every piece of furniture, is unique. Our solid wood and veneer furniture also has a character all of its own: knots, grains and colour nuances come to the fore in different ways with each type of wood. This makes each piece of furniture unique and gives it its natural charm. This is why furniture may not look quite like the store model.

TYPES OF WOOD AND MAINTENANCE

Acacia wood

Acacia, also known as mimosa, is a durable and fast-growing fruit tree whose timber has a fine grain. Ours comes from sustainable plantations. After the tree no longer bears fruit, it is cut down and a new one is planted. Acacia wood has the same properties as mango wood. It is quite hardwearing, but hairline cracks may occur as the wood acclimatizes to your home; this is no reflection on the quality of the furniture, and is simply part and parcel of this type of wood.

Care tips:
All acacia furniture and components are finished with white paint and can be wiped off with a slightly damp microfibre cloth. To protect the paint, we advise against using abrasive materials or rubbing too hard.

Alder wood

Alder is a soft, North American wood species with a subtle grain. Its wood chips are used for smoking salmon. Alder wood is extremely stable and we use it in cabinets and other items, usually painting it first black and then white. It is then lightly sanded it to give an aged look.

Care tips:
Alder wood is used for bases or frames and can be easily wiped with a slightly damp microfibre cloth to remove dirt. Do not use abrasive products, or rub and/or polish too hard.

Ash wood

Ash is a very flexible but strong wood known for its beautiful flamed drawing. This wood is extremely stable and used for large cabinets and cupboards, among other things.

Care tips:
Our ash furniture has a beautiful matt finish. Use a slightly damp micro-fibre cloth, soft brush, or vacuum cleaner to clean off surface dust and crumbs. Do not use abrasive products, or rub and/or polish too hard. We recommend purchasing the Wood Care Kit with ash furniture for optimal care, protection and cleaning. Tabletops should be treated carefully, so we recommend using coasters and mats to prevent damage by hot objects.

Beech wood

The beech wood we use come from European beech, which usually has a pale cream colour and a very fine grain. This wood is mainly used in seat frames.

Care tips:
Beech wood is used for bases or frames and can be easily wiped with a slightly damp microfibre cloth to remove dirt. Do not use abrasive products, or rub and/or polish too hard.

Mango wood

Mango wood is frequently used in Rivièra Maison furniture. This fast-growing timber comes from fruit trees from Indian plantations. The tree is felled when it startsbearing less fruit. Rivièra Maison exclusively uses wood from plantations. Furniture made of mango wood often has the same characteristics as acacia wood furniture, Both arefairly 'wet' types of wood, so hairline cracks may appear as the wood acclimatizes to your home. However, this does not affect the quality of the furniture.

Care tips:
Mango furniture has a beautiful matt finish. Use a slightly damp micro-fibre cloth, soft brush, or vacuum cleaner to clean off surface dust and crumbs. Do not use abrasive substances, or rub or polish too hard. We recommend purchasing the Wood Care Kit with your furniture for optimal protection and cleaning. Tabletops should be treated carefully, and we recommend using coasters and mats to prevent damage by hot objects.

New elm

Our new elm is sustainably harvested and is used for for table frames, large cabinets and cupboards, among other things. We usually paint it first black and then white, and sand it lightly to give it an aged look.

Care tips:
New elm is used for bases or frames. Use a slightly damp microfibre cloth, soft brush, or vacuum cleaner to clean off surface dust and crumbs. Do not use abrasive substances, or rub or polish too hard.

Old elm (Driftwood)

Recycled elm wood, or old elm wood, is one of Rivièra Maison's most commonly used wood types. It is sometimes referred to as drift wood, the appearance and colour differences suggest that it was washed ashore.

The wood of North American elm was originally used to make front doors. Now, 80 to 120 years later, it is reused for tabletops, cabinet doors and drawer fronts, among other things. The used wood gives the furniture a natural and weathered look. The doors are brushed clean, rinsed, and sawn to size. The marks of hinges, locks and door handles are still clearly visible and make each item uniquely old and natural. It is therefore not possible to select tables by colour. Colour variations are even more apparent in mosaic-inlaid tabletops.

Care tips:
Use a slightly damp microfibre cloth, soft brush, or vacuum cleaner to clean off surface dust and crumbs. Do not use abrasive substances, or rub or polish too hard. The surfaces of our old elm coffee, dining and side tables are coated with a clear matt lacquer that preserves their

beautiful old untouched feeling. We recommend purchasing the Wood Care Kit with old elm furniture for optimal care, protection and cleaning. Tabletops should be treated carefully, so we recommend using coasters and mats to prevent damage by hot objects.

Old spruce & fir
This wood comes from the beams of Chinese houses and barns, and is at least 40 years old. It is very durable, and has a lived-in appearance. Small hairline cracks and resin stains may occur.

Care tips:
Spruce and fir furniture has a beautiful matt finish. Use a slightly damp microfibre cloth, soft brush, or vacuum cleaner to clean off surface dust and crumbs. Do not use abrasive substances, or rub or polish too hard. We recommend purchasing the Wood Care Kit with your furniture for optimal protection and cleaning. Tabletops should be treated carefully, and we recommend using coasters and mats to prevent damage by hot objects.

Oak wood
Oak is extremely strong, light in colour and with an attractive grain. We use it in the manufacture of tabletops and cabinet doors.

Care tips:
Our oak furniture has a beautiful matt finish. Use a slightly damp microfibre cloth, soft brush, or vacuum cleaner to remove surface dust and crumbs. Do not use abrasive substances, or rub or polish too hard. We recommend purchasing the Wood Care Kit with your furniture for optimal care, protection and cleaning. Tabletops should be treated carefully, and we recommend using coasters and mats to prevent damage by hot objects.

Poplar wood
Another commonly used type of wood is poplar wood. This comes from sustainable plantations where for every tree felled, a new tree is planted back. Poplar wood is used in products such as table frames and cupboards, and usually first painted black and then white and then lightly sanded to give it an agedlook.

Care tips:
Poplar wood can be easily wiped with a slightly damp microfibre cloth to remove dirt. Do not use abrasive products, or rub and/or polish too hard.

WOOD CARE KIT
The Premium Wood Care Kit - Matt Polish is a unique and complete set. The kit contains an effective cleaner and the Matt Polish. This specialist kit cleans, cares and provides extra protection to wooden furniture. Application may be repeated 4-6 times a year. Follow the instructions on the packaging. Do not use on wooden furniture that has been painted.

Premium Wood Care Kit
Article number: 449790

The luxury box has an exclusive RM sleeve with extra information and explanation and contains various wipes, the cleaner, the matt polish and a hygrometer. This Wood Care Kit is recommended for all unpainted and black wooden horizontal tops of dining tables, bar tables, coffee tables, side tables, side tables and tops of side-boards and TV furniture. All these horizontal surfaces are treated with Matt Polish when new. This protects the table against stains and ambient humidity.

Always remove stains dierectly with just a slightly damp cloth, without aggressive agents and never polish! The Matt Polish layer ensures stains can be easily removed and leave no to minimal permanent stains. Never leave a stain as it will soak deeper into the wood. It is always advised to use coasters, placemats or tablecloths to prevent stains.

Woodcare is used to keep the Matt Pollish coating in good condition and protect the table or surface. The hygrometer gives the customer a tool to measure how high/low the humidity is in the house. Between 40% and 60% is optimal. Too low or high humidity is not good for our wood species. When the humidity is too low, hairline cracks can appear, when it is too high, moisture and mould can affect your furniture. Keeping the Matt Polish layer optimal also protects the furniture against humidity in the house.

UPHOLSTERY FABRIC TYPES
Rivièra Maison upholstery uses both natural and synthetic fibres. Most fabrics consist of a mix of both. When furniture is not ordered at the same time, there may be a colour difference. Furniture fabrics are dyed, and a difference in dye bath (batch) can cause colour slight variations. If you want items to be an exact match for one another, we recommend ordering them all at the same time, so that they can be made from one batch. If you order part of your furniture at a later date, you should bear in mind that there may be a colour difference.

NATURAL FABRICS
Parts of certain plants and trees are suitable after processing for the manufacture of textile fibres, such as cotton and linen. Combining natural fibres with artificial fibres can increase colourfastness and wear resistance.

Cotton
Cotton is a natural and very comfortable fabric that breathes and absorbs well, so it does not sweat easily. Like many natural fibres, cotton is sensitive to (in)direct daylight and sunlight and is prone to creasing. Because cotton absorbs moisture quickly, it can be difficult to clean, and it is often combined with artificial fibres to increase its colourfastness and wear and wrinkle resistance.

Linen
Linen is a natural fibre, made from the stems of flax. It is very airy, breathes well and feels soft and comfortable. Linen creases relatively quickly, making it look soft and inviting. It is a strong fabric, so is not very prone to pilling, but if this does occur it can be removed with a fabric clipper. Like most natural fabrics, linenis sensitive to stains and to discoloration caused by (in)direct daylight and sunlight. Combining linen fibres with artificial fibres can increase colourfastness and wear and wrinkle resistance.

SYNTHETIC FABRICS
Acrylic, polyamide, polyester and polypropylene areexamples of upholstery fabrics made from synthetic fibres of different compositions. Their advantage is that they absorb little moisture and dirt and are less sensitive to discolouration.

Acrylic
Acrylic is a synthetic fibre that is warm and soft to the touch and highly insulating. Acrylic insulates even better than wool. It is also resistant to sunlight. It is a strong fabric, so is not very prone to pilling, but if this does occur it can be removed with a fabric clipper. Like other synthetic fibres, acrylic is easy to clean.

Pellini
Pellini leather is a composite fabric containing 10% leather, so it has the properties of fabric and the look of leather.

Polyester
Polyester is our most commonly used synthetic fibre. Like most synthetic fibres, polyester is easy to clean. It can also withstand (in)direct daylight and sunlight well, and it hardly creases. Polyester can casue static cling and can feel less comfortable than fabrics such as cotton.

Polypropylene
Polypropylene is a synthetic fibre that absorbs little moisture, so furniture and accessories made from it are usually easy to clean.

Polyurethane
Polyurethane is a synthetic fibre often used as a thin top layer for artificial leather. This makes the fabric very wear resistant and easy to clean because dirt does not soak in. The downside, however, is that it does not breathe and thus sweats quickly.

Viscose
Viscose is a synthetic fibre made from a natural raw material. It is soft, comfortable, and supple to the touch, but sensitive to moisture, creasing, and light.

SUSPENSIONS AND FILLING MATERIALS

The filling materials in our seating furniture are supported by a spring base. We mainly use Nosag suspension because of its excellent springy properties. The springs are electrically hardened and last for many years without losing their quality.

Down, flakes and fibre filling
Comfort is obviously one of the most important factors when buying a seat. Our sofas and armchairs usually have a number of compartments filled separately with down feathers, polyether flakes, or fibres, or a combination of these materials.

The seperate compartments prevent the filling from moving from one part of the cushion to another, but it will still spread with use, so we highly recommend shaking them regularly. Otherwise the filling may collapse and stick together to form 'potholes' which are impossible to repair. This is obviously more of a problem for soft fillings than for harder ones. Designers choose soft fillings to give seats a more casual appearance and make them more comfortable to sit on.

Polyether foam
The seating comfort of polyether is very high because of its regular cell structure. Polyether foam can be made with many or few air cells; indicated by its specific weight. The higher this figure, the more solid the foam. If the right specific weight is used, the foam makes for very comfortable seat and back cushions.

Cold foam
Cold foam is a material that breathes and absorbs moisture very well thanks to its open-cell structure. It is a polyurethane foam and is not heated to a high temperature during manufacture, making it very comfortable and durable. A strong counter-pressure occurs, especially when subjected to heavier loads. The material is very comfortable and retains this property throughout its lifetime. Furthermore, cold foam is tear-resistant, fire-resistant, highly elastic, does not give off dust and is anti-allergenic.

Dacron
All of Rivièra Maison's upholstered furniture features several layers of foam on top of each other, surrounded by a thick layer of dacron to increase seating comfort.Dacron is a very soft microfibre made specifically for furniture upholstery. In terms of fabric and padding, for some seats in our collection, the individual seat cushions can be flipped over.

QUALITY INFORMATION

Our furniture is governed by KIM, the official, nationally recognised Dutch product information for upholstery fabrics. This uses the Martindale test: the higher the fabric's Martindale score, the more abrasion resistant it is. Furniture fabrics are divided into five usage categories;

Decorative use (up to 6.000 Martindale)
Fabrics in the 'Decorative use' usage class have a low wear resistance and are only suitable for use on seating furniture that only has a decorative function. For example, an ornamental piece of furniture in the hall or bedroom, and rarely used for sitting on.

Light residential use (6.000 to 15.000 Martindale)
Furniture fabrics in the 'Light residential use' usage class are suitable for furniture subject to low wear and not used on a daily basis.

Normal residential use (15.000 to 40.000 Martindale)
Furniture fabrics in the category 'Normal residential use' can withstand a few hours' use every day in an average family situation. However, abnormal use may lead to greater than average stress on the furniture fabric. For example, a seat in front of the TV that is used for many hours every day.

Intensive residential use (40.000 tot 75.000 Martindale)
The usage class 'Intensive residential use' indicates a strong furniture fabric that can withstand several hours of intensive daily use, for example in a busy household. This usage class is also recommended when there is a fixed seat in front of the TV that is used for many hours every day.

Intensive living and working (75.000 Martindale and above)
Extra strong furniture fabrics are those in the 'Intensive living + working' usage class. As the name suggests these fabrics are also suitable for use in work situations or a computer workstation at home. They can be used intensively for many hours every day.

LIGHTFASTNESS

Lightfastness indicates the extent to which a fabric is resistant to discolouration under the influence of sunlight, daylight and artificial light. All fabrics discolour to a greater or lesser extent, especially when regularly exposed to direct sunlight for many hours. Discolouration is more noticeable in darker colours than in lighter ones. Lightfastness is divided into three classes:

Adequate
Furniture fabrics with a lightfastness rating of 'Sufficient' are reasonably resistant to (in)direct artificial and/or daylight. These fabrics should not be exposed to (in)direct sunlight.

Good
Furniture fabrics in this class are resistant to artificial light and daylight and reasonably resistant to (in)direct sunlight. Long-term exposure to (in)direct sunlight may cause discolouration.

Very good
These furniture fabrics are highly resistant to artificial light and daylight and reasonably resistant to sunlight. If they are exposed to sunlight for a long period, discolouration may occur.

GENERAL INFORMATION

Influence of (in)direct light
Furniture fabrics will always discolour to a greater or lesser extent over time when exposed to direct or indirect daylight and sunlight. This differs from one fabric to another. Fabrics with natural fibres such as cotton and/or linen, will discolour faster under certain circumstances.

Cushions and comfort
Several of our seats have cushions containing loose filling, such as down feathers, flakes or fibre, which make them particularly comfortable. We recommend shaking these on a weekly basis, or the filling may stick and sag, causing 'potholes'. Also, seats that are used more often feel softer and more supple than those used less frequently.

Switch & turn
We recommend regularly shaking loose seat, back and decorative cushions to keep them in shape. We also advise you to regularly switch and turn over the cushions. In some cases, both the seat and back cushions are reversable and can be used on both sides. This makes it easy to switch and turn them. In other seating furniture, the cushions can only be switched and not turned. In order to be able to turn the cushions anyway, carefully remove the cushion filling from the cover and then put it back into the cover when it is turned upside down.

The advice is to change the cushions four to six times a year, turn them and shake them up regularly. If you look after your upholstery, you'll be able to enjoy your purchase for longer.

Creasing
When you buy a piece of upholstered piece of furniture, it looks taut and not quite 'worn' on the outside. For optimal seating comfort, the filling should become about 20% more flexible; how long this takes depends on the type of filling and fabric. A hard cushion filling always becomes a little softer and stretches with use, causing creases. This is perfectly normal, and nothing to worry about.

Discolouration due to heat
The fabric and colour of the seat can be affected by heat sources in the immediate vicinity. If you place it close to a central heating system or stove, the fabric may fade in colour of crackle due to heat.

Dehydration by dry air
Dry air can cause fabric or pellini leather to dehydrate, making it more susceptible to damage. We recommend using a humidifier to maintain humidity levels. This is not only better for the fabric or pellini, but also for your own health and comfort.

Chemicals and sharp objects
Buckles, zips and rivets in jeans clothing can damage fabric and pellini leather, and so can pets' claws. Hairspray, gel, nail polish, glue and other volatile products contain acetone. A single drop of acetone will cause irreparable damage. Furniture fabrics are also very sensitive to other chemicals, so beware.

Pilling
Another thing that can affect the appearance of upholstery fabrics is pilling. These loose strands or balls of fibre appear over time and can be removed with a lint comb or textile clippers, both available at chemists. This phenomenon is harmless, and nothing to worry about.

Wear and tear
Unfortunately, all upholstery fabrics wear out eventually. How long they last will obviously depend on how intensively they are used.

Loose threads
Our seating is handcrafted, and no matter how carefully we upholster it, threads may become loose in the fabric. You can push these back with a curved needle or cut them off. If in doubt, you can always contact our customer service department for advice.

Shading
Through use, fake shading spots are created, Shading makes your upholstery look as if water has been spilled on it. But it's not a stain, merely a spot where the grain of the fabric is not pointing in a uniform direction and which appears darker or lighter than the rest of the fabric, depending on the point of view. This is simply an optical effect and therefore has nothing to do with discolouration. The spots can be removed using a vacuum cleaner with a clean brush head and soft bristles. This restores the grain to a single direction and as an added bonus removes dust and dirt.

FIRST AID FOR STAINS
Always experiment by cleaning an invisible part of the fabric first. If you purchased purchased the Textile Care Kit, follow the instructions for use on the packaging.

Stains caused by solid substances?
Remove the substance immediately with a spoon. Scrape off the substance, pressing it into the fabric as little as possible. Then pat dry with a tissue or clean tea towel.

Stains caused by liquids?
Do not rub! Dab the liquid with a tissue or clean tea towel dipped in lukewarm water, and repeat as often as necessary.

TEXTILE CARE KIT
The Premium Textile Care Kit is a unique and complete set without stain protection service. This kit contains two specialised products: a Textile Protector for protecting the fabric and Cleantex for optimal cleaning of both used and new upholstery fabrics. The pack is good for 3 seats. Applicable to all Rivièra Maison textiles.

Premium Textile Care Kit
Article number: 449770

This luxury box with exclusive RM sleeve contains a protection spray and cleaner. Read the instructions carefully before use. The Textile Care Kit is recommended for all uphol-stered furniture. Protects against stains and dirt. We recommend repeating the treatment twice a year. Always clean the furniture first and then treat with the care product.
